1 Introduction

Write a description about your proposed project and how much of that proposal have you materialized.

1.1 Proposed Goals

In short describe the objective and motivation you have announced in your proposal.

1.2 Project Accomplishment

Briefly describe how much of your proposed project have been completed, what you proposed as features and what have you completed. How satisfied are you with the project that you have done so far and how much you are satisfied with it.

2 Project Features

Enlist the features you have implemented in your project. If possible provide a clean comparison between the proposed features and implemented ones.

3 Database Diagram

Utilize this section to represent the changes you have done to your database throughout the timeline of this project and also what were the limitations of those design. If there are no modification in a certain step, you may skip that part and omit it from your report or simply write that there were no required modifications.

3.1 Proposed Diagram

Show your initial proposed database diagram.

Limitations

- Limitation 1
-

3.2 Evaluation 1 Diagram

Show your database diagram you prepared for evaluation 1.

Limitations

- Limitation 1
-

3.3 Evaluation 2 Diagram

Show your database diagram you prepared for evaluation 2.

Limitations

- Limitation 1
-

3.4 Final Diagram

Show your final database diagram.

Limitations

- Limitation 1
-

4 Contribution

Add specific contribution of each member of your group. Showing using pie-chart is highly encourage. Also, you may show GitHub contribution chart as well. In other words, visual representation alongside written is encouraged. You can also divide your total work into specific sub portions and describe how you managed the work. In this portion you have to show how your whole team has participated in the project and contributed in it. Direct division of work load equally to every member without any proper explanation (i.e.: for three member groups everyone contributed 33% or for two member groups everyone contributed 50%) is strictly discouraged.

5 Conclusion

Write a brief conclusion about the project.

5.1 Limitations

Write overall limitations you have faced while working on the project.

5.2 Future Work

You can add future works here.

5.3 Project Link

Upload your project to GitHub and share the link in this portion. Avoid writing raw URL, instead hyperlink it with text like done [here](#).

5.4 Ending Remarks

Add some of your ending or concluding remarks regarding your project.
